PERFORMANCE. RESPONSIBILITY. INNOVATION.

WienCont stands for **innovative logistics solutions, excellent service and consistently reliable performance** – making it the most efficient trimodal container terminal in Austria.

Since our founding in 1979, we've been operating at the Port of Freudenau in Vienna. Here, in the heart of Europe, **we connect rail, water, and road** to offer our international clients a comprehensive portfolio of container handling services.

All our operations prioritize **resource conservation and economic efficiency**. In rail traffic, we use an innovative momentum-based entry system that eliminates the need for shunting. In addition, by using **hydropower and photovoltaic systems**, we make a significant contribution to **reducing CO_2 emissions** – enabling logistics that are not only powerful, but also sustainable.

THERE'S A REASON WHY WE ARE UNSTOPPABLE.

OUR SERVICES – FOR YOUR SUCCESS

HANDLING
Efficient container handling via rail, road, and water – fast, reliable, and digitally supported.

DEPOT
Secure container storage including special zones for hazardous goods and reefer plugs.

CONTAINER REPAIRS
On-site or mobile repair services – including certified reefer inspections by trained professionals.

TRADE
New and used containers for rent or purchase – customizable to suit your needs.

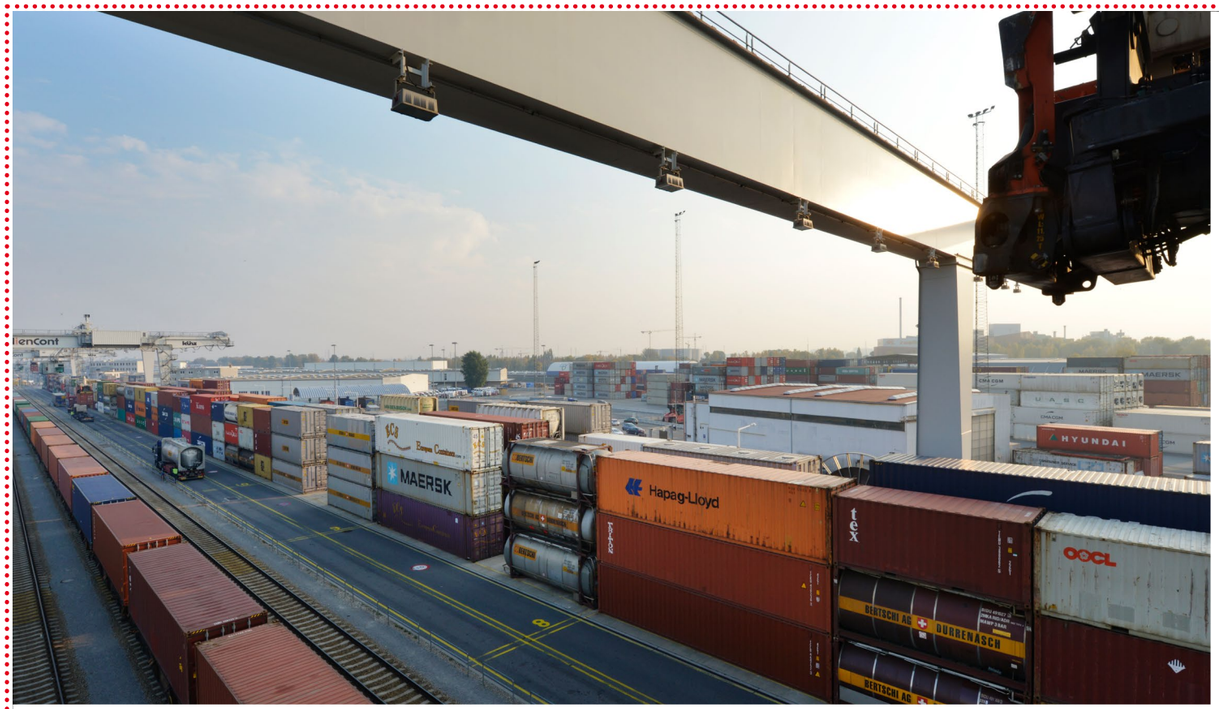

DIGITAL PROCESSING
Automated OCR ingate, digital rail gates and innovative entry technologies for efficient container tracking.

SOLAS WEIGHING
Certified public weighing site with reach stacker.

HAZARDOUS GOODS CONSULTING
Advice from certified hazardous goods officers.

LAST MILE
Pre- and post-haulage from our site at the Port of Vienna Freudenau – in co-operation with experienced partners.

ENVIRONMENT & RESPONSIBILITY
HVO100 and photovoltaics make an important contribution to reducing our CO_2 emissions. According to our latest CO_2 assessment (as of October 2026), we have reduced these emissions by 75% since 2022.

HANDLING CAPACITY

STATE-OF-THE-ART INFRASTRUCTURE FOR MAXIMUM HANDLING PERFORMANCE

Benefit from decades of experience and extensive capacity at one of Central Europe's leading inland terminals.

The terminal spans around **200,000 m²** and offers optimal conditions for efficient and seamless container handling. With eight high-performance rail tracks directly on site and an annual **handling capacity of around 700,000 TEU,** WienCont is a central logistics hub for rail, road and inland waterway transport.

Fully automated OCR gates for road and rail traffic capture all truck and train movements quickly, securely and seamlessly. This enables seamless digital documentation and process optimization across all modes of transport.

We rely on a **highly trained team and state-of-the-art equipment**, including one barge crane, three 45-ton gantry cranes and 16 container stackers with lifting capacities ranging from 6 to 45 tons.

This makes WienCont not only Austria's most active terminal but also one of the most modern inland terminals in Europe.

TRUSTED CARE FOR YOUR CONTAINER

With **storage space for about 10,000 TEU**, our empty container depot offers large areas for secure temporary storage, **check-in/ check-out** and **professional repair** for all types and sizes of containers. **Digital workflows** ensure fast turnaround and transparency.

The depot includes **more than 200 trailer parking slots** for flexible transport and handling solutions. With integrated reefer plugs, it supports temporary **temperature-controlled storage** – ideal for intermediate storage or pre-carriage logistics.

Our location at the trimodal terminal at the Port of Vienna Freudenau offers **seamless integration** into your supply chain **via road, rail, and water.**

Whether interim storage, condition assessment or technical maintenance – at WienCont, your equipment is managed with precision and professionalism.

PROFESSIONAL REPAIR SERVICES – MOBILE AND ON-SITE

WienCont stands for **quality and expertise in container logistics** – and equally for repair services you can rely on. Our goal is to ensure containers are in perfect condition – safe, fully functional, and ready for use. Whether mobile or at the terminal, our experienced technicians perform professional repairs to the highest standards. With many years of experience, technical know-how and a clear commitment to quality, we are your reliable partner for all aspects of container maintenance. **Quality through competence is our everyday standard.**

Flexible service – mobile and on-site
Whether at our terminal or directly at your location - our repair teams are quickly available to minimize downtime and keep your operations running efficiently.

More than just repairs
In addition to maintenance and repairs, we also offer expert advice, condition assessments and CSC inspections to ensure your containers are safe and compliant for international deployment.

CUSTOMIZED CONTAINER SOLUTIONS

WienCont is your reliable partner for the **purchase and rental of containers**. Our range includes **new and used storage and shipping containers**, as well as **office, sanitary, reefer and event containers** for a wide variety of applications. We also provide **custom-made solutions and complete container systems** tailored to individual requirements – including electrical installations, windows, doors and ventilation elements. Our portfolio is complemented by **accessories for purchase or rental**, as well as solutions for stacking, handling and security.

Thanks to direct storage logistics at our terminal, we can respond **quickly and flexibly** to your requirements. Our container sales team combines **technical expertise with market knowledge** and supports you from selection through to final processing.

Whether you are looking to buy or rent, WienCont offers **reliable container solutions, tested quality and maximum flexibility.**

PERFECTLY CONNECTED

As a trimodal terminal in the heart of Vienna, WienCont is a **key hub in European freight transport**. Our location serves as a central driving force for logistics in Europe – with high-performance rail links to major seaports and commercial centers.

We offer frequent rail connections to Hamburg, Bremerhaven, Rotterdam, Koper and Trieste, as well as Central and Eastern Europe. WienCont is also a strategic hub for traffic towards Southeastern Europe and Turkey.

With its location on **three major TEN-T corridors – Baltic–Adriatic, Orient–East Med and Rhine–Danube** – WienCont provides direct access to key European transport routes. This strategic position ensures seamless connectivity, short transit times, high service frequency and dependable scheduling across the continent.

With **eight rail tracks**, efficient rail handling and a **fully automated OCR rail gate** for accurate tracking of all train movements, we prioritize maximum efficiency and transparency in rail operations.

WienCont offers sustainable and multimodal rail logistics – **reliable, eco-friendly and perfectly connected**.

WE DON'T JUST MOVE CONTAINERS – WE MOVE CAREERS

At the core of everything we do is a strong team of around **120 dedicated employees** who bring expertise, commitment and team spirit to ensure that operations remain efficient and on track every single day.

Our colleagues receive regular training and ongoing development, because **true quality comes from people, not just from technology**.

To continue operating at the highest level in the future, we are always looking for qualified professionals in logistics, container handling and metalworking – and for people who want to **shape the future of container logistics with us.**

WE NEVER STOP GIVING THE BEST.

Sounds like a workplace with perspective?
We look forward to receiving your application and getting to know what makes you unique.
