COMPANY

WE GUARANTEE A TRIMODAL HIGH PERFORMANCE – NEUTRAL AS ONE HUB FOR ALL

Our trimodal terminal in Vienna connects three modes of transport: rail, waterway and road. Trimodality means not only flexibility while saving the environment, but also an opportunity to benefit from the specific advantages of each of these three transport modes. Our unique entrance technique using only the momentum of the trains, allows efficient handling at the terminal with no shunting operations required from either side.

For over 40 years, we have been steadily on the move. The world is constantly changing its demands and we answer them: With flexible service, reliable performance and state-of-the-art technology for more efficiency and sustainability.

SERVICES

WE MAKE IT WORK

WienCont offers a wide range of additional services at its Vienna Freudenau location, which can give clients a head start in terms of handling, depot and trade.

Repair Services

A partnership with FTSC GmbH enables WienCont to offer stationary as well as mobile repair services.

Location Services

Our subsidiary Terminal-Sped offers additional, immediately available services such as customs and trucking services. Supplementary services as stripping and stuffing by our mother company Hafen Wien and SOLAS weighing complete our portfolio.

Last Mile

Together with its longstanding partners, WienCont also offers pre- and onward carriage from the Vienna Freudenau location to complement rail and waterway. Clients can use synergies of the market leader in used container trading and gain advantages from optimized routes.

Full Automatic OCR Ingate

3 photo-gates at the entrance and exit, 9 line-scan-cameras, 6 infrared-cameras, 6 self-check-in stations and 2 kiosk terminals offer perfect time-saving container handling at the highest level.
